Morse Code Bracelets

Supplies
- Embroidery floss
- 3 colors of seed beads
- Beading Needle
- Morse Code alphabet

Additional Supplies Needed:
- Scissors
- Tape

Tips: Use a paper plate to keep your beads from rolling around. When spelling out the word, it may be helpful to place the beads on a paper towel to stay in order.

Step One: Designate which color beads will be your dots, dashes, and spaces. (Example: white for dots, teal for dashes, silver for spaces). Spell out your word using the Morse Code alphabet key included on the back. Use one space bead between each letter. You can add extra spaces at beginning and end of word to frame it. How many beads to use will depend on how far you would like beading to go around your wrist.

Step Two: Cut embroidery floss into three pieces about 11 inches long each. Tape one end to a flat surface. Thread floss through your needle.

Step Three: Carefully slide beads in order onto your floss.

Step Four: Once your word is completely spelled, center beads on piece of floss. Tie a knot onto each side of word to keep beads from sliding apart.

Step Five: If you are planning to wear multiple bracelets at one time, complete steps 1-4 for each bracelet. Then, lay in order and tie bracelets together with a single knot on each end. This will make it easier to tie to your wrist.

Step Five: Tie around your wrist and marvel! You can trim off excess floss if desired.

**Personalization Ideas:** Endless options with these! Inspirational sayings, names, places. We can't wait to see how they turn out! Don't forget to show us your fabulous creations on our Way Public Library Facebook page!

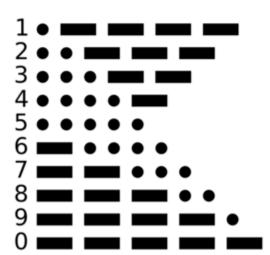

Happy crafting!

Morse Code

Morse Code is a method used in telecommunications to encode text characters as standardized sequences of two different signal durations, called *dots and dashes.*

Letter	Code		Letter	Code
A	·—		U	··—
B	—···		V	···—
C	—·—·		W	·——
D	—··		X	—··—
E	·		Y	—·——
